CUL SERIES

The CUL-series is a semi-modular power supply that lets you select the cables you need while powering your gaming system with a 140mm Blue LED cooling fan and 6 pin PCI-E ready. Everyone likes a clean and easy installation. This power supply allows you to keep what you want and remove what you don't. While necessary connectors, like the 20+4 pin power & 4+4 pin CPU connector are attached to the unit, you decide which of the others should stay. Customize your power supply to reflect your system.
Features

- ATX 12V V2.3 version
- Automatic fan setting for most effective cooling system
- Native and modular cables for a clean and easy installation
- Smart cable management
- Great balance between cooling and noise level

- 140mm Blue LED silent fan design
- All output cables with nylon sleeving
- 6 pin PCI-E Connector ready
- 6+2 PCI-E connectors (at 750W)
- Over voltage protection, short circuit protection on all output levels
