

NB-410

A notebook cooler that's paper thin and light as feather, this notebook cooling pad is everything your laptop needs. Feel the breeze, not the weight. Enjoy the power of a dual fan system without the heavy, oversized fans. Equipped with extra USB ports for your optical devices, so you now have extra connections you didn't have before. Convenient. Practical. Efficient. This is the new NB-410.

Features

- Equipped with dual fans for efficient cooling
- Fans built for long-life and low noise level
- Plastic casing for a light and easy travel
- Extra foldaway USB 2.0 ports to mount external optical drives
- USB bus powered
- LED backlight to illuminate the simple, but stylish sleek appeal
- User-friendly, built for durability and practicality

NB-410

Dual fan system

Feel the breeze. Don't let your notebook overheat. The dual fan system cools your notebook quickly and quietly.

Thin and light for easy travel

Paper thin and feather light. Feel the breeze, not the weight. Built for convenience. Ease your travels.

Extra USB 2.0 ports

Use the two extra USB 2.0 ports for your external optical drives. This cooler won't hog it all.

USB bus powered

Don't get stuck to the wall with power adapters. Plug the USB cable into your notebook and let it do its thing. Keep cool while you work.
